Transition to Eminence G. M. Hiranandani 2005 This volume of the navy's history covers the period from 1976 to 1990. It examines the navy's success in keeping abreast of advances in technology in step with progressive self-reliance. In a decade and a half of innovation, the navy equipped its indigenously built frigates, corvettes, and other vessels with combinations of the latest available weapons and equipment from the Soviet Union, from Europe, and from indigenous sources. A tiny "ship design cell," which in 1965 was designing yard craft, was by 1990 designing an aircraft carrier, submarines, and missile destroyers. The new acquisitions from the Soviet Union ranged from missile destroyers, conventional submarines, and long-range reconnaissance aircraft, to minesweepers. All these high-tech inductions needed to be operated and manned by better-educated and better-trained personnel. New maintenance, repair, and refit facilities had to be created. The increase in the volume of spares and the diversity of sources compelled modernization of the logistics system. This volume analyzes how these problems were tackled.

Conflict Between India and Pakistan Peter Lyon 2008 Presents 250 alphabetical entries on topics related to the conflict between India and Pakistan from the time of Partition up to the present day.

Deterrence Stability and Escalation Control in South Asia Henry L. Stimson Center 2013-12-13 India and Pakistan have developed and flight tested seventeen new nuclear weapon delivery vehicles since testing nuclear devices in 1998 - an average of more than one per year. Military doctrines have also evolved to emphasize more rapid mobilization to engage in limited conventional warfare. Diplomacy to reduce nuclear risks has lagged far behind nuclear weapon-related advances and doctrinal change. Since 1998, Pakistan and India have negotiated four notable military-related Confidence-Building and Nuclear Risk Reduction Measures. No new measures have been agreed upon since 2007. There is no basis for deterrence stability on the Subcontinent when diplomacy and nuclear risk reduction are moribund while nuclear capabilities grow and military doctrines evolve. The most desirable off-ramp to increased nuclear dangers is to secure normal relations with a nuclear-armed neighbor. This collection of essays - the product of bi-monthly discussions at the Stimson Center - provides analysis and ideas for deterrence stability and escalation control on the Subcontinent. This pursuit awaits leadership in India and Pakistan that is strong enough to persist in the face of violent acts designed to disrupt progress.

The Man Who Bombed Karachi: A Memoir Admiral S.M. Nanda 2015-10-01 Admiral S.M. Nanda started his career with the Royal Indian Navy. The post-Independence days posed a challenge for the nation and its defence forces and, as a young officer, he witnessed the fledgling navy grow from strength to strength. The crowning glory of his career, which spanned thirty-two years, came when he was appointed Chief of Naval Staff at a time when tensions with Pakistan were at their peak and the government was looking for a firm hand at the helm. He achieved distinction and honour for the remarkable role he played in the 1971 war for the liberation of Bangladesh, devising tactics to neutralize the Pakistan navy. The main target was the Karachi port, where the bulk of the Pakistan fleet was stationed. In his memoir, Admiral S.M. Nanda focuses on this significant event, providing a detailed account of how the Indian Navy carried out the operation. The Man Who Bombed Karachi is the inspiring story of how a childhood fascination for the sea led an outstanding officer to rise to the pinnacle of India's armed forces. It gives a glimpse into life in the Royal Indian Navy, with a dramatic rebellion by Indian sailors against their British superiors, and traces its evolution into an organization that is today a force to reckon with globally. Most of all, it is an insider's authentic account of the inventive naval strategies that led to one of India's biggest victories in war to date.

Indian National Congress and the Struggle for Freedom, 1885-1947 Amalek Tripathi 2014-03-03 This volume presents an analytical history of India's struggle for freedom and the role played in it by the Indian National Congress. It provides a comprehensive account of the Independence movement, encompassing events such as the extremist-moderate split in the Congress, Morley-Minto reforms, Round Table Conferences, the Quit India Movement, and the Partition. Drawing on statistical analysis and exhaustive research, it examines the impact of prevailing domestic and international economic conditions on the evolution of the politics of the Congress, the Muslim League, as well as the Indian revolutionary, socialist, and communist parties. The book also throws light on the complex interplay of power politics between the Centre, the States, and the various grass-roots organizations on one hand and the push and pull of Hindu-Muslim communal politics on the other. This is the first English translation of the Bengali classic Swadhinata Sangrame Bharatiya Jatiya Congress: 1885-1947 (first published in 1990) by the late Professor Amalek Tripathi, an eminent scholar and a renowned historian. This translation also carries a foreword by Dr Rudrangshu Mukherjee.

The Next Arms Race Henry D. Sokolski 2015-01-31 With most of the world's advanced economies now stuck in recession; Western support for defense cuts and nuclear disarmament increasing; and a major emerging Asian power at odds with its neighbors and the United States; it is tempting to think our times are about to rhyme with a decade of similar woes—the disorderly 1930s. Might we again be drifting toward some new form of mortal national combat? Or, will our future more likely ape the near-half-century that defined the Cold War—a period in which tensions between competing states ebbed and flowed but peace mostly prevailed by dint of nuclear mutual fear and loathing? The short answer is, nobody knows. This much, however, is clear: The strategic military competitions of the next 2 decades will be unlike any the world has yet seen. Assuming U.S., Chinese, Russian, Israeli, Indian, French, British, and Pakistani strategic forces continue to be modernized and America and Russia continue to reduce their strategic nuclear deployments, the next arms race will be run by a much larger number of contestants—with highly destructive strategic capabilities far more closely matched and capable of being quickly enlarged than in any other previous period in history.

Naval Power in the Twentieth Century N.A.M. Rodger 2016-07-27 It is a century since Mahan and his disciples taught the world that a battlefleet was indispensable to a great power. Great and not so great powers still keep powerful navies today, but we have no generally-accepted principles to explain why. In this book historians and naval officers from Britain, the United States and other countries study the use of naval power over a century, and ask what it is for, and what it can do. It will be essential reading for modern historians, policy-makers and strategists.

The Chinese People's Liberation Army In 2025 Roy Kamphausen 2019-08-26 This volume is of special relevance in light of the profound changes occurring within the Chinese People's Liberation Army (PLA). China's desire to develop a military commensurate with its diverse interests is both legitimate and understandable. The challenge for U.S. Pacific Command (USPACOM) is to understand how China will employ this growing military capability in support of its interests. The book addresses the uncertainty surrounding the potential direction of the PLA by examining three distinct focus areas: domestic, external, and technological drivers of PLA modernization; alternative futures for the PLA; and, implications for the region, world, and U.S.-China relations. The analysis provides an insightful perspective into the factors shaping and propelling the PLA's modernization, its potential future orientation ranging from internally focused to globally focused, and how the PLA's choices may impact China's relations with its neighbors and the world.

Sustainable Security Jeremi Suri 2016-10-27 As the world shifts away from the unquestioned American hegemony that followed in the wake of the Cold War, the United States is likely to face new kinds of threats and sharper resource constraints than it has in the past. However, the country's alliances, military institutions, and national security strategy have changed little since the Cold War. American foreign and defense policies, therefore, should be assessed for their fitness for achieving sustainable national security amidst the dynamism of the international political economy, changing domestic politics, and even a changing climate. This book brings together sixteen leading scholars from across political science, history, and political economy to highlight a range of American security considerations that deserve a larger role in both scholarship and strategic decision-making. In these chapters, scholars of political economy and the American defense budget examine the economic engine that underlies U.S. military might and the ways the country deploys these vast (but finite) resources. Historians illuminate how past great powers coped with changing international orders through strategic and institutional innovations. And regional experts assess America's current long-term engagements, from NATO to the chaos of the Middle East to the web of alliances in Asia, deepening understandings that help guard against both costly commitments and short-sighted retrenchments. This interdisciplinary volume sets an agenda for future scholarship that links politics, economics, and history in pursuit of sustainable security for the United States - and greater peace and stability for Americans and non-Americans alike.

Look East, Cross Black Waters Jonah Blank 2015-10-13 India 's core goals for Southeast Asia are in basic harmony with those of the United States, including regional stability, peaceful settlement of territorial disputes, and containment of radicalism. Still, America should not expect India to enter any sort of alliance, nor join any coalition to balance against China, but should demonstrate strategic patience and willingness to cultivate a long-term relationship.

Empires of Faith in Late Antiquity Ja Elsner 2019 "This book reveals the rewards of exploring the relationship between art and religion in the first millennium, and the particular problems of comparing the visual cultures of different emergent and established religions of the period in Eurasia - Buddhism, Hinduism, Zoroastrianism, Islam, Judaism, Christianity and the pagan religions of the Roman world. Most of these became established and remained in play as what are called 'the world religions'. The chapters in this volume show how the long traditions of studying these topics are caught up in complex local, ancestral, colonial and post-colonial discourses and biases, which have made comparison difficult. The study of late antiquity turns out also to be an examination of the intellectual histories of modernity"--

The Hero of Kargil & Other Stories Lt Gen Yashwant Mande 2010-01-01 The stories in this book pertain to the wars, which India has fought since its Independence in 1962, 65, 71 and 99. The war stories have always aroused the curiosity of the readers. Although many books have been written on conflicts between India and its neighbours, no author has attempted to write stories. This book is therefore unique, the only one of its kind, a book of fiction on events and characters, in the background of war. The wars have topical interest and as time passes, one forgets them and gets engrossed in current issues. This is natural. However, certain events such as missile attack on Karachi, shattering of enemy offensive by Hunter aircraft at Longewala, the role played by the aircraft carrier INS VIKRANT and the heroics of men in uniform have a lasting value, an element of permanence. These stories provide insight into ethos, culture and lifestyle of the armed forces, their values, hardships and character. The stories narrate the account of war and unfold its conduct in easy and interesting manner. The stories have been written in simple and endearing style. It is a book, which ought to be read by all, the old and young.

Operation X Captain M.N.R. Samant 2019-06-25 In April 1971, the Indian Navy's Directorate of Naval Intelligence set up a covert maritime warfare unit - Naval Commando Operations (X) (NCO[X]). This black unit's existence was known to very few even within the navy. Its covert operation aimed at disrupting the maritime commerce lines that sustained the Pakistan Army in its eastern province. Over the next few months, this irregular unit, comprising Indian naval officers, divers, and former Pakistani submariners, set to work. They transformed over 400 Bengali youths from East Pakistan into combat swimmers, trained to assault merchant ships. The gunboats of NCO(X)'s naval wing mined shipping channels and harassed shipping entering East Pakistan. The ferocious campaign waged by this tiny unit was without precedent in the annals of naval warfare. They sank and disabled over 100,000 tonnes of shipping in the province, in support of the government of Bangladesh in exile. Their actions contributed towards India's ultimate victory in the eastern theatre of the December 1971 Indo-Pak war. Revealed for the very first time, here is the explosive authentic account - co-authored by a key NCO(X) member - of the guerrilla operation that went for the maritime jugular of Pakistan, and facilitated the birth of Bangladesh.

Sri Lanka at the Crossroads of History Zolt á n Biedermann 2017-06-07 The peoples of Sri Lanka have participated in far-flung trading networks, religious formations, and Asian and European empires for millennia. This interdisciplinary volume sets out to draw Sri Lanka into the field of Asian and Global History by showing how the latest wave of scholarship has explored the island as a ' crossroads ' , a place defined by its openness to movement across the Indian Ocean. Experts in the history, archaeology, literature and art of the island from c.500 BCE to c.1850 CE use Lankan material to explore a number of pressing scholarly debates. They address these matters from their varied disciplinary perspectives and diverse array of sources, critically assessing concepts such as ethnicity, cosmopolitanism and localisation, and elucidating the subtle ways in which the foreign may be resisted and embraced at the same time. The individual chapters, and the volume as a whole, are a welcome addition to the history and historiography of Sri Lanka, as well as studies of the Indian Ocean region, kingship, colonialism, imperialism, and early modernity.

Stress Tested: The Covid-19 Pandemic and Canadian National Security Leah West 2021-12 The emergence of COVID-19 has raised urgent and important questions about the role of Canadian intelligence and national security within a global health crisis. Some argue that the effects of COVID-19 on Canada represent an intelligence failure, or a failure of early warning. Others argue that the role of intelligence and national security in matters of health is--and should remain--limited. At the same time, traditional security threats have rapidly evolved, themselves impacted and influenced by the global pandemic. Stress Tested brings together leading experts to examine the role of Canada's national security and intelligence community in anticipating, responding to, and managing a global public welfare emergency. This interdisciplinary collection offers a clear-eyed view of successes, failures, and lessons learned in Canada's pandemic response. Addressing topics including supply chain disruptions, infrastructure security, the ethics of surveillance within the context of pandemic response, the threats and potential threats of digital misinformation and fringe beliefs, and the challenges of maintaining security and intelligence operations during an ongoing pandemic, Stress Tested is essential reading for anyone interested in the lasting impacts of the COVID-19 pandemic.

The Royal Indian Navy Kalesh Mohanan 2019-10-08 This book presents a comprehensive history of the Royal Indian Navy (RIN). It traces the origins of the RIN to the East India Company, as early as 1612, and untangles the institution ' s complex history. Capturing various transitional phases of the RIN, especially during the crucial period of 1920 – 1950, it concludes with the final transfer of the RIN from under the British Raj to independent India. Drawn from a host of primary sources—personal diaries and logs, official reports and

documents—the author presents a previously unexplored history of colonial and imperial defence policy, and the contribution of the RIN during the World Wars. This book explores several aspects in RIN's history such as its involvement in the First World War; its status in policies of the British Raj; the martial race theory in the RIN; and the development of the RIN from a non-combat force to a full-fledged combat defence force during the Second World War. It also studies the hitherto unexplored causes, nature and impact of the 1946 RIN Revolt on the eve of India's independence from a fresh perspective. An important intervention in the study of military and defence history, this will be an essential read for students, researchers, defence personnel, military academy cadets, as well as general readers.

Rin Mutiny, 1946 Biswanath Bose 1988 The book is written on the basis of historical background imbibing the facts of the final phase of India's liberation movement, valorous deeds of the teenaged Indian sailors in the uprising and has unearthed many notable events of the contemporary period. A condensed account of the entire episode written in a manner to throw light to the hidden glory of Indians struggling for freedom. RIN MUTINY: 1946 is laudable to all freedom loving people. It contains not only the most authentic version of a leading participant in the Mutiny but also those who were associated with him in the Strike Committee. The book has also covered International and National press reports, participating warships and naval establishments all over the country. Reviews "The book is certainly a very good attempt for an authentic portrayal of hitherto unpopular but sensitive event of Indian history. There is sufficient material for the students of history and inquisitive readers as well as research scholars". Dr B. C. Kalita, Review Projector (India), Vol. 9, No. 7 & € " 9. The author of this book was a participant in the historic uprising of the courageous sailors who wrote a glorious chapter in the history of our freedom movement. This reviewer congratulates the author for the painstaking work that he took in making his own contribution and bringing together other valuable material. E.M.S. Namboodiripad, People & €™s Democracy, June 25, 1989. "The book under review is a noble attempt to draw attention of both historians and the patriotic people to the immortal heroes within the military personnel who fought and died during India's struggle for freedom. Biswanath Bose's work has done a remarkable job by vividly presenting the history of a glorious battle which our official historians ignore wilfully to shield our national heroes, somewhat unjustifiably". P.N. Dhar, The Quarterly Review of Historical Studies, Vol. XXIX (4), pp. 59 & € " 62

Travel and Ethnology in the Renaissance Joan-Pau Rubi & s 2002-09-05 This book, first published in 2000, offers a wide-ranging and ambitious analysis of how European travellers in India developed their perceptions of ethnic, political and religious diversity over three hundred years. It analyses the growth of novel historical and philosophical concerns, from the early and rare examples of medieval travellers such as Marco Polo, through to the more sophisticated narratives of seventeenth-century observers - religious writers such as Jesuit missionaries, or independent antiquarians such as Pietro della Valle. The book's approach combines the detailed contextual analysis of individual narratives with an original long-term interpretation of the role of cross-cultural encounters in the European Renaissance. An extremely wide range of European sources is discussed, including the often neglected but extremely important Iberian and Italian sources. However, the book also discusses a number of non-European sources, Muslim and Hindu, thereby challenging simplistic interpretations of western 'orientalism'.

Geocultural Power Tim Winter 2019 Launched in 2013, China's Belt and Road Initiative is forging connections in infrastructure, trade, energy, finance, tourism, and culture across Eurasia and Africa. This extraordinarily ambitious strategy places China at the center of a geography of overland and maritime connectivity stretching across more than sixty countries and incorporating almost two-thirds of the world's population. But what does it mean to revive the Silk Roads for the twenty-first century? Geocultural Power explores this question by considering how China is couching its strategy for building trade, foreign relations, and energy and political security in an evocative topography of history. Until now Belt and Road has been discussed as a geopolitical and geoeconomic project. This book introduces geocultural power to the analysis of international affairs. Tim Winter highlights how many countries--including Iran, Sri Lanka, Kenya, Malaysia, Indonesia, Pakistan, and others--are revisiting their histories to find points of diplomatic and cultural connection. Through the revived Silk Roads, China becomes the new author of Eurasian history and the architect of the bridge between East and West. In a diplomatic dance of forgetting, episodes of violence, invasion, and bloodshed are left behind for a language of history and heritage that crosses borders in ways that further the trade ambitions of an increasingly networked China-driven economy.

No Way But Surrender Nilkanta Krishnan 1980 Account of a vice-admiral.

1946 Royal Indian Navy Mutiny: Last War of Independence Pramod Kapoor 2022-02-25 In 1946, 20,000 non-commissioned sailors of the Royal Indian Navy mutinied. They were inspired by the heroism of the Azad Hind Fauj. But their anger was sparked by terrible service conditions, racism, and broken recruitment promises. In less than 48 hours, 20,000 men took over 78 ships and 21 shore establishments and replaced British flags with the entwined flags of the Congress, the Muslim League, and the communists. The British panicked and announced a Cabinet Mission to discuss modalities of transfer of power. By this time, Indian troops had refused to fire on the ratings, and the mutiny sparked revolts in other branches of the armed forces. The young ratings presented a charter of demands, even as they fought pitched battles against British troops. People thronged the streets in support, and hartals were followed by street fights between civilians and British soldiers resulting in over 400 deaths and 1,500 injured. To quell the rebellion, British commanded their powerful warship HMS Glasgow to sail rapidly from Trincomalee and ordered low sorties by the Royal Air Force fighter planes. In retaliation, the ratings trained the guns mounted on the captured ships towards the shore, threatening to blow Gateway of India, Yacht Club, and the dockyards. As violence escalated, telegrams flew between the Viceroy's office and the British Cabinet. The British realized they could no longer hold India by force. While the communists continued to support the rebellious ratings, the Congress and the Muslim League persuaded them to surrender, promising they would not be victimized. Shamefully, years later, the governments of India and Pakistan refused to honour those promises after Independence. The mutiny caused public disagreements between Gandhiji and Aruna Asaf Ali, and between Sardar Patel and Nehru. Historians say it accelerated the transfer of power. But this seminal event, which inspired songs, art and theatre has been edited out of the popular narratives of the Freedom Movement.
