It includes coverage of the subjunctive and past progressive, selecting which tense is the most definite, identifying when a word is used as a subordinating conjunction/preposition, explaining how a comma can change meaning, and an increased emphasis on the passive. *Jumpstart! Grammar* will prepare children for any grammar tests on the horizon in an engaging way so that they love playing with words and spinning sentences to make ideas dance. And, of course, they will be able to name the parts if that is what is required. Fun games will focus first on helping children hear the difference various types of grammar can make followed by activities to help them understand what different effects you can create with grammar. Technical terms will only be introduced once the children have established what the various features can do, with a particular focus on those terms that really help children discuss what makes language coherent and effective. This indispensable, practical book celebrates the joys of language and coherent expression; of finding just the right words or phrases to express what you want to say.

The Last Lecture Randy Pausch 2010-07-01 'A phenomenon' SUNDAY TIMES A lot of professors give talks titled 'The Last Lecture'. Professors are asked to consider their demise and to ruminate on what matters most to them: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave, 'Really Achieving Your Childhood Dreams', wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humour, inspiration, and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

No More Bananas Jeroen Kraaijenbrink 2019-06-21 "Feel better, get done more and become a nicer person" In this age of social media, fake news, individualism and information overload, the certainties we relied on in the past are gone. In our quest for assurance and support, the only seemingly dependable pillar left is other people. So we look to them. But they are unsettled too. And by looking to them, we create and perpetuate our own vicious stress-cycle. As a result, we lose our sensible selves. And we go bananas. But there is good news. If we look around us, there are people who withstand the collective lunacy and stay grounded. They do something that most of us have a hard time doing: they stay themselves. And the best news is that what they can do, you can do too. It doesn't require any special talents or supernatural powers. It only requires doing. In this amiable, open and

accessible book, Jeroen Kraaijenbrink takes you on his personal journey out of Bananaland. Drawing from cognitive psychology, martial arts, Saint Benedict, personal experience, and a wide range of other sources, the book offers a nine-step approach with some remarkably practical advice for keeping a cool head in the collective lunacy. "Free yourself from the collective lunacy and reclaim your calm and sensible self"

_____ Your ability to change everything - including yourself - starts here Chemist Elizabeth Zott is not your average woman. In fact, Elizabeth Zott would be the first to point out that there is no such thing. But it's the early 1960s and her all-male team at Hastings Research Institute take a very unscientific view of equality. Except for one: Calvin Evans, the lonely, brilliant, Nobel-prize nominated grudge-holder who falls in love with - of all things - her mind. True chemistry results. Like science, life is unpredictable. Which is why a few years later, Elizabeth Zott finds herself not only a single mother, but the reluctant star of America's most beloved cooking show, *Supper at Six*. Elizabeth's unusual approach to cooking ('combine one tablespoon acetic acid with a pinch of sodium chloride') proves revolutionary. But as her following grows, not everyone is happy. Because as it turns out, Elizabeth Zott isn't just teaching women to cook. She's daring them to change the status quo. _____ SOON TO BE A MAJOR APPLE TV SERIAL, STARRING BRIE LARSON 'I loved *Lessons in Chemistry* and am devastated to have finished it!' Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-12-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family-which includes all primary caregivers-are at the foundation of children's well-being and healthy development. From birth, children

are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

White Fragility Robin DiAngelo 2019-02-07 The International Bestseller 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to "bad people." In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' Claudia Rankine
Anger. Fear. Guilt. Denial. Silence. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial

justice alongside one that we need only to be clearer, try harder, and do better' David Roediger, Los Angeles Review of Books 'The value in White Fragility lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' Katy Waldman, New Yorker 'A vital, necessary, and beautiful book' Michael Eric Dyson
