Agenda Setting: A Wise Giver's Guide to Influencing Public Policy John J. Miller 2015-03-07 Donating money to modify public thinking and government policy has now taken its place next to service-centered giving as a constructive branch of philanthropy. Many donors now view public-policy reform as a necessary adjunct to their efforts to improve lives directly. This is perhaps inevitable given the mushrooming presence of government in our lives. In 1930, just 12

percent of U.S. GDP was consumed by government; by 2012 that had tripled to 36 percent. Unless and until that expansion of the state reverses, it is unrealistic to expect the philanthropic sector to stop trying to have a say in public policies. Sometimes it's not enough to build a house of worship; one must create policies that make it possible for people to practice their faith freely within society. Sometimes it's not enough to pay for a scholarship; one must change laws so that high-quality schools exist for scholarship recipients to take advantage of. Yet public-policy philanthropy has special ways of mystifying and frustrating practitioners. It requires understanding of governmental practice, interpretation of human nature, and some philosophical perspective. Public-policy philanthropists may encounter opponents operating from different principles who view them as outright enemies. Moreover, public-policy struggles never seem to end: victories one year become defeats the next, followed by comebacks, then setbacks, and on and on. This book was written to help donors navigate all of those obstacles. It draws on deep history, and rich interviews with the very best practitioners of public-policy philanthropy in America today. Whatever your aspirations for U.S. society and governance, this guide will help you find the best ways to make a difference.

The Complete Guide to Home Theaters Lisa Montgomery 2015-04-17 You've probably seen home theaters in the pages of home improvement and technology magazines like Electronic House. You may have even encountered one at the home of a friend or colleague. Perhaps you've stopped at a home electronics store and have seen a home theater there. Have you ever wondered what it takes to create these elegant, high-performing A/V masterpieces? Our Complete Guide to Home Theater Planning will walk you through the process, step by step. As you'll learn, creating a home theater requires carefully planning to get right, some imagination and plenty of time and patience. It's hard work, but the results can be phenomenal—something that pleases every member of your family and adds real value to your house. And here's some really good news: Any room in your house can function admirably as a home theater, as long as you design the space correctly and select and install the A/V equipment carefully. This book discusses the pros and cons of the morphing existing rooms into home theaters, as well as building a space from the ground up. The appropriate types of equipment for each type of space are suggested, and classic mistakes to avoid are divulged. And if being on the cutting edge is important to you, there's a complete chapter dedicated to a discussion

about the new audio and video trends that are worth consideration. You can take your theater project a step further by adding features like dimmable lighting, specialty seating, fiber optic "star" ceilings and more. Although these amenities will add to your bottom line, they're an effect way to put your own personal stamp on your theater, making it a space that's uniquely yours. We'll introduce you to some of these unique home theaters—both ones that have been designed and installed entirely by the homeowners themselves and ones that have been created by seasoned home systems professionals. You'll gain loads of advice and gather great inspiration for tackling your own home theater project. Good luck and happy home theater building!

 The "People Power" Family Superbook: Book 13. Shopping Guide (Online Shopping, Product Reviews, Department Stores, Trade Shows, Closeout – Wholesale, Factory Outlets) Tony Kelbrat 2014-03-31 In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.
