Teaching and Learning Methods in Medicine Shahih Zaidi 2014-10-18 This book considers the evolution of medical education over the centuries, presents various theories and principles of learning (pedagogical and andragogical) and discusses different forms of medical curriculum and the strategies employed to develop them, citing examples from medical schools in developed and developing nations. Instructional methodologies and tools for assessment and evaluation are discussed at length and additional elements of modern medical teaching, such as writing skills, communication skills, evidence-based medicine, medical ethics, skill labs and webinars, are fully considered. In discussing these topics, the authors draw upon the personal experience that they have gained in learning, teaching and disseminating knowledge in many parts of the world over the past four decades. Medical Education in Modern Times will be of interest for medical students, doctors, teachers, nurses, paramedics and health and education planners.

Archiving an Epidemic Robb Hernández 2019-11-19 Critically reimagines Chicana art, unmasking its queer afterlife Emboldened by the boom in art, fashion, music, and retail culture in 1980s Los Angeles, the iconoclasts of queer Aztlan—as Robb Hernández terms the group of artists who emerged from East LA, Orange County, and other parts of Southern California during this period—developed a new vernacular with which to read the city in bloom. Tracing this important but understudied body of work, Archiving an Epidemic catalogs a queer retelling of the Chicana and Chicano art movement, from its origins in the 1960s, to the AIDS crisis and the destruction it wrought in the 1980s, and onto the remnants and legacies of these artists in the current moment. Hernández offers a vocabulary for this multi-modal avant-garde—one that contests the heteromascularity and ocular surveillance visited upon it by the larger Chicana community, as well as the formally straight conditions of traditional archive-building, museum institutions, and the art world writ large. With a focus on works by Mundo Meza (1955–85), Teddy Sandoval (1949–1995), and Joey Terrill (1955–), and with appearances by Laura Aguilar, David Hockney, Robert Mapplethorpe, and even Eddie Murphy, Archiving an Epidemic composes a complex picture of queer Chicana avant-gardisms. With over sixty images—many of which are published here for the first time—Hernández's work excavates this archive to question not what Chicana art is, but what it could have been.

Web Content Management Deane Barker 2016-03-22 Looking to select a web content management system (CMS), but confused about the promises, terminology, and buzzwords? Do you want to understand content management without having to dive into the underlying programming? This book provides a clear, unbiased overview of the entire CMS ecosystem—from platforms to implementations—in a language- and platform-agnostic manner for project managers, executives, and new developers alike. Author Deane Barker, a CMS consultant with almost two decades of experience, helps you explore many different systems, technologies, and platforms. By the end of the book, you'll have the knowledge necessary to make decisions about features, architectures, and implementation methods to ensure that your project solves the right problems. Learn what content is, how to compare different systems, and what the roles of a CMS team are Understand how a modern CMS models and aggregates content, coordinates workflow, and manages assets Explore the scope and structure of a CMS implementation project Learn the process and best practices for successfully running your CMS implementation Examine the practice of migrating web content, and learn how to work with an external CMS integrator

A Reader's Companion to the Short Story in English Erin Fallon 2013-10-31 Although the short story has existed in various forms for centuries, it has particularly flourished during the last hundred years. Reader's Companion to the Short Story in English includes alphabetically-arranged entries for 50 English-language short story writers from around the world. Most of these writers have been active since 1960, and they reflect a wide range of experiences and perspectives in their works. Each entry is written by an expert contributor and includes biography, a review of existing criticism, a lengthier analysis of specific works, and a selected bibliography of primary and secondary sources. The volume begins with a detailed introduction to the short story genre and concludes with an annotated bibliography of major works on short story theory.

Brains Through Time Georg F. Striedter 2020 "Much is conserved in vertebrate evolution, but significant changes in the nervous system occurred at the origin of vertebrates and in most of the major vertebrate lineages. This book examines these innovations and relates them to evolutionary changes in other organ systems, animal behavior, and ecological conditions at the time. The resulting perspective clarifies what makes the major vertebrate lineages unique and helps explain their varying degrees of ecological success. One of the book's major conclusions is that vertebrate nervous systems are more diverse than commonly assumed, at least among neurobiologists. Examples of important innovations include not only the emergence of novel brain regions, such as the cerebellum and neocortex, but also major changes in neuronal circuitry and functional organization. A second major conclusion is that many of the apparent similarities in vertebrate nervous systems resulted from convergent evolution, rather than inheritance from a common ancestor. For example, brain size and complexity increased numerous times, in many vertebrate lineages. In conjunction with these changes, olfactory inputs to the telencephalic pallium were reduced in several different lineages, and this reduction was associated with the emergence of pallial regions that process non-olfactory sensory inputs. These conclusions cast doubt on the widely held assumption that all vertebrate nervous systems are built according to a single, common plan. Instead, the book encourages readers to view both species similarities and differences as fundamental to a comprehensive understanding of nervous systems. Evolution; Phylogeny; Neuroscience; Neurobiology; Neuroanatomy; Functional Morphology; Paleoecology; Homology; Endocast; Brain"--

Cleveland's Vanishing Sacred Architecture Barry K. Herman 2010 As in other cities, Cleveland has developed through the evolution of its European ethnic neighborhoods and their various religions. Many of these neighborhoods built their own churches, which became the focus of community development and unity. For decades, these churches thrived, but the new millennium has brought with it huge changes in the economy. Large "membership" institutions, like the Catholic Church, have had to make the toughest of decisions--closing churches that were thought to be a permanent part of the local landscape. The authors of this book feel it is important to preserve the memory of these significant religious, cultural, and social institutions so that the current and future generations do not forget them. The pictures of these incredible places take on a whole new meaning when coupled with the fact that they will soon be gone. These pages celebrate the architecture, art, and artifacts of these sacred structures in high-quality photographs and explanations.

Olmsted Dale Thomas 2011 North Olmsted's images illustrate the urbanization resulting from the economic boom following World War II. In contrast, Olmsted Falls and Olmsted Township still have the atmosphere of a small town, resembling its larger neighbor before the war.

Reading the Market Peter Knight 2016-09 Introduction -- Market reports -- Reading the ticker tape -- Picturing the market -- Confidence games and inside information -- Conspiracy and the invisible hand of the market -- Epilogue

North Olmsted Dale Thomas 2008 North Olmsted's history began in 1815 with David Johnson Stearns of Vermont. Stearns was followed to the area by other pioneers from New England, and they established a settlement in the wilderness of southwestern Cuyahoga County. North Olmsted went from being an isolated farming community to a village in 1908 and then to a city in 1951. The stage was then set for it to rapidly grow into a thriving suburb in the last half of the 20th century. North Olmsted's rich heritage is illustrated in this book through historic photographs from the Olmsted Historical Society that highlight the city's residents, businesses, social centers, and schools.

A Princeton Companion Alexander Leitch 2015-03-08 In this unusual and unique volume, Alexander Leitch provides a warm, often witty, and always informative reference book on Princeton University. The collection of approximately 400 articles, alphabetically arranged and written by some seventy faculty members and alumni in addition to the author, covers all aspects of Princeton life in the past as well as in the present. Of special interest are the biographies of eminent Princetonians, including the University's presidents, well-known trustees, distinguished deans, famous alumni, and some of Princeton's most prominent and popular professors. Other articles in the book embrace a wide range of topics: histories of academic departments, programs, and research units; descriptions of the honor system, the preceptorial method, the four-course plan, and coeducation; a historical survey of the University's acquisition of land and the development of its campus, together with articles on its principal buildings; pieces on student activities; accounts of alumni activities; articles on athletics; portraits of notable personalities; and commentaries on a host of lighter topics such as the cane spree, beer jackets, the Faculty Song, the proctors, and Veterans of Future Wars. Among the most important articles are one summarizing Woodrow Wilson's Sesquicentennial address, "Princeton in the Nation's Service," and a dozen others recording faculty and alumni achievements toward the goal encompassed by that phrase. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly

heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The President Is Dead! Louis L. Picone 2020-02-04 *Updated Edition* A fun, anecdote-filled, encyclopedic look at the circumstances surrounding the deaths of every president and a few "almost presidents," such as Jefferson Davis. Packed with fun facts and presidential trivia, *The President Is Dead!* tells you everything you could possibly want to know about how our presidents, from George Washington to George H. W. Bush (who was the most recent president to die), met their ends, the circumstances of their deaths, the pomp of their funerals, and their public afterlives, including stories of attempted grave robbings, reinterments, vandalism, conspiracy theories surrounding their deaths, and much more. *The President Is Dead!* is filled with never-before-told stories, including a suggestion by one prominent physician to resurrect George Washington from death by transfusing his body with lamb's blood. You may have heard of a plot to rob Abraham Lincoln's body from its grave site, but did you know that there was also attempts to steal Benjamin Harrison's and Andrew Jackson's remains? The book also includes "Critical Death Information," which prefaces each chapter, and a complete visitor's guide to each grave site and death-related historical landmark. An "Almost Presidents" section includes chapters on John Hanson (first president under the Articles of Confederation), Sam Houston (former president of the Republic of Texas), David Rice Atchison (president for a day), and Jefferson Davis. Exhaustively researched, *The President Is Dead!* is richly layered with colorful facts and entertaining stories about how the presidents have passed. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Cortland and Bazetta Township Sally Lane 2012 In the winter of 1804-1805, Edward Scofield and a small group entered the township in search of a creek suitable for a mill and good land for settlement. Within a few years, Walnut Run, a tributary of Mosquito Creek, was providing waterpower to a gristmill and a sawmill, and other settlers began to arrive. The area around the mill was called by various names: first, Leroy, as named by Scofield, or East Bazetta, referring to its location east of Mosquito Creek that divided the township nearly in half; then Baconsburgh because of the many settlers from the Bacon family; and finally Cortland following incorporation. Over the years, the area around Walnut Run flourished, churches were built, businesses and industries were established, and a lake was built during World War II. Then, as now, people worked very hard to make Bazetta Township and its only city a great place in which to live.

Struthers Revisited Patricia Ringos Beach in association with the Struthers Historical Society 2015 What more is there to say about Struthers that was not said in *Images of America: Struthers*, published in 2008? It turns out there is plenty. *Images of America: Struthers Revisited* features the people and places that filled this northeastern Ohio town in the 1900s. Through the growth and decline of the steel industry, the town prospered and adapted. Children grew up, marriages occurred, and people died; however, as anyone affiliated with Struthers knows, they could not be buried in the "city without a cemetery." This collection of images illustrates stories of accomplishment, struggle, and everyday life. Photographs of schools, churches, small grocery stores, businesses, eateries, parks, and playgrounds will transport readers to a time that is both familiar and historical. This walk down memory lane is for all ages. It is for those who reside in Struthers and those who used to live there and love to visit.

Hello, It's Me Chris Epting 2010-07-01 In *Hello, It's Me*, pop culture historian Chris Epting celebrates the cultural touchstones of the past 40 years—the music, movies, television, hobbies, and fads that have defined recent generations. Whether it's shooting hoops with NBA legend Elgin Baylor, drinking whiskey in a Radio City Music Hall broom closet with Ron Wood and Rod Stewart while thousands of fans scream from below, sharing a milkshake with Jerry Lewis, running into Alfred Hitchcock's stomach as a young child, or jumping on a trampoline with Sally Struthers, Chris Epting takes us on his own strange trip through time, space and hula hoops. Beginning in the 1970s and continuing through the 1980s, 1990s, and up to the present day, Epting writes about the humorous, ironic, poignant, and inspiring moments he's experienced with a host of pop-culture icons—Mick Jagger, Keith Richards, Jay Leno, Johnny Thunders, Edward Albee, John Cheever, Milton Berle, etc.—as well as his personal memories of the era's most famous pop-culture fads, products, and gimmicks—Pet Rocks, lava lamps, mood rings, 8-track tapes, bootleg records, Zotz, halter tops, strawberry wine. . . .

Hubbard Barbara Emch 2005 Hubbard traces its heritage to the historic Connecticut Western Reserve and is the living legacy of Nehemiah Hubbard Jr., a member of the Connecticut Land Company who purchased 15,274 acres and hired Samuel Tylee, Hubbard's first settler, as his land agent to measure and sell lots. Hubbard remained a quiet farming community until the coal-mining boom of the early 1860s changed its future forever. Immigrants from Europe flocked here to work in the mines, and the industrialization of this small town began in earnest. Prosperity continued until the decline of the region's steel industry in the 1970s and, later, the loss of several major businesses. Along with the new millennium, however, came the formation of the Joint Economic Development District between Hubbard City and Township, which brought much-needed development to the Interstate 80, State Route 7/U.S. 62 corridor.

Physical Disability and Sexuality Xanthe Hunt 2021-02-08 This open access edited volume explores physical disability and sexuality in South Africa, drawing on past studies, new research conducted by the editors, and first-person narratives from people with physical disabilities in the country. Sexuality has long been a site of oppression and discrimination for people with disabilities based on myths and misconceptions, and this book explores how these play out for people with physical disabilities in the South African setting. One myth with which the book is centrally concerned, is that people with disabilities are unable to have sex, or are seen as lacking sexuality by society at large. Societal understandings of masculinity, femininity, bodies and attractiveness, often lead people with physical disabilities to be seen as being undesirable romantic or sexual partners. The contributions in this volume explore how these prevailing social conditions impact on the access to sexual and reproductive healthcare, involvement in romantic relationships, childbearing, and sexual citizenship as a whole, of people with physical disabilities in the Western Cape of the country. The authors' research, and first person contributions by people with physical disabilities themselves, suggest that education and public health policy must change, if the sexual and reproductive health rights and full inclusion of people with disabilities are to be achieved.

Ashtabula Evelyn Schaeffer 2005 Post-World War II Ashtabula was a major Great Lakes port with a thriving downtown. Local photographer Richard E. Stoner began taking photographs of the growing city in 1938, and for the next 58 years, his lens captured Ashtabula's businesses, industries, and citizens. His commercial accounts ranged from the harbor's Pinney Dock and Transport Company, to Main Avenue's locally-owned Carlisle-Allen Company department store, to Ashtabula's major war industries. Dick Stoner's earlier photographs capture the Ashtabula that once was, including the week-long Sesquicentennial Celebration of 1953. His later photos record the beginnings of fundamental change in our way of life. Also included in this volume are some pre-1930s photographs by Vinton N. Herron, whose work Stoner purchased when Herron retired. For Ashtabulans, this is a family album. For others, it is a look at a bygone time in Midwest America.

Central Ohio's Historic Prisons David Meyers 2009 With the opening of the Ohio State Reformatory in 1896, the state legislature had put in place "the most complete prison system, in theory, which exists in the United States." The reformatory joined the Ohio Penitentiary and the Boys Industrial School, also central-Ohio institutions, to form the first instance of "graded prisons; with the reform farm on one side of the new prison, for juvenile offenders, and the penitentiary on the other, for all the more hardened and incorrigible class." However, even as the concept was being replicated throughout the country, the staffs of the institutions were faced with the day-to-day struggle of actually making the system work.

A History of Catholic Education and Schooling in Scotland Stephen J. McKinney 2019-05-23 This book analyses the development of Catholic schooling in Scotland over the course of the nineteenth and twentieth centuries. Scholarship of this period tends to be dominated by discussions of the 1872 and 1918 Education (Scotland) Acts: while these crucial acts are certainly not neglected in this volume, the editors and contributors also examine the key figures and events that shaped Catholic education and Catholic schools in Scotland. Focusing on such diverse themes as lay female teachers and non-formal learning, this volume illuminates many under-researched and neglected aspects of Catholic schooling in Scotland. This wide-ranging edited collection will illuminate fresh historical insights that do not focus exclusively on Catholic schooling, but are also relevant to the wider Scottish educational community. It will appeal to students and scholars of Catholic schooling, schooling in Scotland, as well as Christian schooling more generally.

Art in America 1988-09

Austintown Joyce Hunsinger Pogany 2007 Austintown Township was first inhabited by Native Americans. In 1788, it became Range 3, Township 2, of the Connecticut Western Reserve and was named for Calvin Austin, a land agent for the Connecticut Land Company. In 1794, John McCollum was the first settler. In 1820, the population was 718. By 1880, coal miners and families increased the population to 2,502. The damming of Meander Creek creating Meander Reservoir put Ohltown underwater and flooded some of West Austintown. After World War II, Austintown grew tremendously. Throughout this growth, one constant remained--the schools. Moving from 12 one-room schoolhouses to one large consolidated school to 8 school buildings, the schools remain central to the community and preserve Austintown's identity.
